

Name: _____

Biomes Poster Viewing Assignment

Biome Name	General Location	Temperature and Precipitation (BRIEFLY describe. Focus on most distinctive aspects for each biome. Sometimes the climatographs help you decide what is most distinctive.)	Adaptation of Plants and Animals (BRIEFLY describe one that you think is important for the biome)	Environmental Issue (Briefly describe the issues occurring in this biome.)
Tundra				
Taiga (Boreal Forest)				
Temperate Deciduous Forest				
Temperate Grassland (Steppe, Prairie)				

Biome Name	General Location	Temperature and Precipitation	Adaptation of Plants/Animals	Environmental Issue
Desert				
Savanna (Tropical Grassland)				
Tropical Rainforest				

1. Describe the trend in temperature and precipitation as you move from North to South.

2. How do the abiotic factors affect the adaptations of the plants and animals?

3. What are some of the conservation efforts around the world?
